Reference: NJAC 7:27-2.8 (Open Burning of Dangerous Materials)
Permit No. C-1013-5 Expiration Date: 11-25-87
Location of Burning Permit: Colts Neck, N. J.

Dear Sir:

Enclosed is your approved permit for the open burning of dangerous materials. Deviation from your affidavit filed with this bureau is not permissible without first obtaining written approval. Deviations without such approval may be subject to penalties.

The issuance of this permit does not relieve the U. S. Navy from obtaining and complying with all other applicable permits, local ordinances, permissions, licenses, regulations, and statutes.

As a condition of this approval you must notify the Supervisor of the Central Regional Office at 609-426-0796, at least 24 hours in advance of when the permitted burning is to take place. Failure to do this will be a violation of N.J.A.C. 7:27-2.8 for which you may be penalized as prescribed by law.

Another condition of this permit is that you shall make every effort to reduce and eventually eliminate the quantity of dangerous materials to be burned and the frequency of such burning. Any renewal of this permit for a period beyond its present expiration date will be contingent upon your efforts and accomplishments in reducing the need to do such burning. Future applications must be accompanied by a certified report describing and documenting the measures taken and the results of such measures toward eventually eliminating the need to burn.

Enclosed are additional application forms. These forms should be filed with this bureau at least fifteen (15) days before the expiration date of your current valid permit if you believe there is a need to continue to dispose of dangerous materials by open burning.

Very truly yours,
Richard Craig
